

LAWNS IN SPAIN

Lawn repair — Lawn Re-New cost examples

Let us offer you peace of mind for your healthy green lawn all year round

Project 4, Issue 1

Newsletter Date: Autumn 2012

Lawn Repair

If your lawn is established and just needs some minor attention, then repairing it is essential as the problem, if

quickly gets out of hand.

Below is an example of a lawn with some bald patches and maybe some bug or fungus damage. We will inspect your lawn*, sup-

ply plugs and/or seed as appropriate, provide fertiliser and or pesticide and/or fungicide as required.

So if your lawn is developing brown patches, going yellow, or looking generally unwell, we will investigate and provide a solution, all included in the price.

We know from experience that this approach always works out to be more cost efficient than the try "it and see" method.

left untreated, almost invariably gets worse and

Lawn RE-New

If your lawn has less than 50% grass then a restart or lawn re-new approach needs to be adopted. More importantly the reason for its failure needs to be found otherwise the same problem may reoccur.†

Below is an example of a large area of lawn that has died over a period of two years. This clearly will only get worse if left untreated.

We will inspect your lawn* and supply all the necessary products to get you going and re-establish your beautiful green lawn.
